DASHBOARD OVERVIEW

- The dashboard currently includes data from (2014 - Present) allowing users to analyze trends and performance over this period, with new data being added over time.
- Data is captured and aggregated on a weekly basis, enabling insights that are both current and consistent over time.
- All pages include a toggle option, allowing switching between weekly and monthly views.
- Comparative analysis allows users to compare data across different time periods, such as month-on-month or year-on-year to identify growth trends and seasonal patterns.
- Geographical breakdown presents data segmented by regions or locations, helping users understand geographical variations in key metrics.
- Visuals like line charts illustrate trends over time, making it easy to spot patterns and changes in key metrics.
- Each region has its own dedicated page for focused analysis that will enable detailed insights and comparison across different geographical areas.
- Dynamic time selection adjusts the data displayed in the card as well as line charts.
